

Technical Development Manager Australia & New Zealand (m/f/d)

21MW029307

Our client is one of the global top companies for state-of-the-art alternative crop protection solutions for agriculture and special crops. The company's portfolio includes foliar fertilizers, biologicals and related products for modern plant cultivation.

Our client has a R&D pipeline well-filled with innovative products.

What you can expect:

- Plan and coordinate product trials in the region
- Consolidate related results
- Prepare registration documents
- Promote and present findings in meetings and trade fairs
- Technical support of regional customers (focus Australia)
- Reporting line to the global business development manager
- Partner with area sales manager
- Monitor and report regional crop systems and technical developments
- Competitive salary
- Working from home, preferably in Australia

What is required:

- Sound agronomic experience based on a university degree in agriculture or horticulture or comparable qualification
- First relevant practical experience in the field
- Knowledge of farming best practices regarding fertilization and crop protection challenges
- Self-motivated and committed
- Pioneering spirit
- Ability to work in a team
- Maintain attention to details, and prioritize and meet deadlines
- Willingness to travel extensively nationally and internationally
