

# Regional Manager Foliar Fertilizers Northern Europe (m/f/d)

771121042

Our client is among the global top companies for state-of-the-art alternative crop protection solutions for agriculture and special crops. The company's portfolio includes foliar fertilizers, biologicals and related products for modern plant cultivation. Our client has a strong R&D pipeline with innovative products.

## What you can expect:

- You will drive sales activities within specific countries, in particular Germany and Poland
- You are the first contact of existing distributors
- You will identify and develop new markets within the region
- You lead the innovation pipeline in terms of new applications
- You ensure the technical development and support of the products
- Working from home

## What is required:

- Sound agronomic experience based on a university degree in agriculture or horticulture or comparable
- Cash crop experience desired
- 5+ years sales experience
- Confident individual with strong communication skills
- Open to frequent international travel
- Fluent in German and English
- Additional European languages welcome
